

Type 1 Facility Closeout Report

Section A. Facility Data

Facility No.	T130C
Facility Descriptor:	Administrative trailer
Project:	RISS
Date of Demolition:	4/8/05-4/9/05
Additional Information:	Attached
<i>(Must include information on environmental releases and conditions of site at turnover to Environmental Restoration)</i>	

Section B. Final Characterization Data

Reconnaissance Level Characterization Report	6/3/03
<i>(concurrence received)</i>	
In-process Characterization	N/A
Pre-Demolition Survey Report <i>(approval received)</i>	RLC functioned as PDS
Post-Demolition Survey Report <i>(as necessary)</i>	N/A

Section C. Waste Data *(complete categories as appropriate)*

Sanitary Disposal

Disposal Site:	BFI Foothills Hwy 93
Waste Volume (m ³):	2507.56
Waste Weight (tons):	527.28
Additional Information:	Waste included the building structure and asphalt pad.

Hazardous Disposal

Disposal Site:	Kettleman Hills Facility, Kettleman City, CA or Bethlehem Apparatus CO, Hellertown, PA
Waste Volume (lbs):	2800
Additional Information:	Circuit boards, fluorescent lamps, Hg switches, etc. were moved to a RFCA Temporary Unit and combined with like waste streams for disposal. (8) 1/8" lead sheets from X-ray room walls to Kettleman.

TSCA Waste Disposal

Disposal Site:	BFI Foothills Hwy 93
Waste Volume (m ³):	<1
Additional Information:	PCB ballasts were sent to the landfill as PCB Bulk Product Waste commingled with building debris.

Asbestos Waste Disposal

Additional Information:	N/A
	No asbestos waste was generated

Low-Level Waste Disposal

Additional Information:	N/A
	No LLW waste was generated

Low-Level Mixed Waste Disposal

Additional Information:	N/A
	No LLM waste was generated

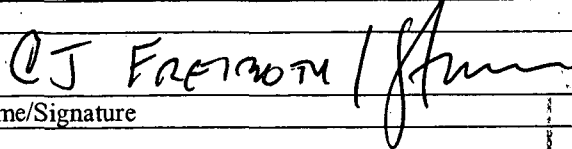

Recycled Material

Recycle Facility:	Freon 134A & R12
Waste Volume (lbs):	PU&D
Additional Information:	40
	Reclaimed freon sent to PU&D for future resale

Property Disposition

Receiver Locations <i>(major items only)</i> :	N/A
Volume (m ³):	N/A
Weight (tons):	N/A
Additional Information:	Miscellaneous small items suitable for resale were removed by PU&D

Section D. Approvals

Kaiser-Hill Project Manager	 Name/Signature	06/04/05 Date

ADMIN RECORD

Additional Facility Information

T130C was a 15,400 square-foot general office trailer approximately 120-feet wide by 130-feet long. The trailer had corrugated metal siding with corrugated metal skirting. The entrances had wooden stairs leading to a wooden enclosure.

The interiors were primarily a cubical layout, but had several hard-walled offices, conference rooms, and rest rooms. Interior walls were wallboard and the ceiling was a drop ceiling with acoustical tiles and recessed lighting.

T130C housed general management and administrative activities such as Analytical Services, Waste Shipping support personnel, Ecology, and Regulatory Compliance. Prior to demolition, T130C served as Occupational Medicine.

T130C had the following utilities: electrical, plant water, plant sanitary, and fire protection was provided by an overhead sprinkler system and wall mounted fire extinguishers. Water lines were isolated at a depth of six feet. Sanitary sewer was plugged at manhole MH-5. Underground electrical wiring was completely removed as were the transformer and switchgear. See attached maps for utility isolation points.
